Organization of an Invited Talk and an Interaction session

CEHTI, JUIT organized an invited talk on the topic "Radioisotopes in medicine and research" on 14th Dec., 2018. A renowned academician Prof. D.K. Dhawan from Department of Biophysics, Panjab University, Chandigarh delivered the talk. Prof. Dhawan discussed about how radioisotopes could be utilized for the detection and cure of several human diseases. He delivered the talk in a research oriented manner. Faculty members and PhD scholars from departments of BT & BI and PMS, JUIT attended the lecture. Prof. Dhawan also interacted with the faculty members of both the departments. Lecture was praised by everybody and lots of information was gained by research scholars on the sensitive usage of radioisotopes in medical research. After the lecture a token of respect was presented to Prof. Dhawan by Heads of both the departments, Prof. Sudhir Kumar and Prof. P.B. Barman. Prof. Dhawan also proposed for any collaborative work with JUIT in near future. It is believed that this kind of collaboration will definitely help the faculty members and research scholars of both the institutions. This Event was coordinated by Dr. Tiratha Raj Singh.
