

ICSMC 2021

An International Conference on Structures, Material and Construction 2021
Organised By - Department of Civil Engineering JUIT, Wahnaghat

In association with |

ICSMC2021 PRESENTATION GUIDELINES

ICSMC2021 will be held via the GOOGLE MEET platform on 12th and 13th November 2021. To prepare for the virtual conference, we ask you to please review the following guidelines and specifications carefully before giving your presentation.

- ✓ **MANDATORY TO PRESENT THE PAPER.** It is mandatory to read your research work to the audience not only for your knowledge sharing but also to make the best use of the platform for exchanging research ideas and overall development of intellectual minds.
- ✓ **PREPARE A POWERPOINT PRESENTATION OF 10 TO 15 SLIDES.** A visual presentation focussing mainly on the need of study, methodology, results and discussions and conclusions is extremely helpful for your audience, as it is legible and not large enough to view / read. You will probably find you have prepared more slides than you need for a crisp presentation.
- ✓ **PRESENTATION SHOULD BE LIMITED TO 10 MINUTES WITH 5 MINS OF Q&A.** It is not possible to pour a conference paper into a 10-minute presentation. Instead, summarize the storyline of your paper, then present some 'cut' of your work that will encourage people to read the whole story. As a rule of thumb, depth beats breadth; four points made well will come across better than 10 rushed through.
- ✓ **PLEASE DO NOT READ FROM YOUR PAPER.** This is particularly important at a conference such as ICSMC, where you will be presenting your ideas to a broader group dealing in materials and environment than the (potentially) specialist group that will read your paper. In any case, listeners appreciate a presentation focused on key ideas, rather than a rushed attempt at the full text.
- ✓ **PLEASE KEEP TO TIME!** Session moderators will indicate you through an audio *ALARM WARNING BELL* prior 2 mins (at 8 mins) than your scheduled 10 mins presentation. The session moderator will not give you extra time as this will cut into someone else's presentation or into the question-and-answer period.
- ✓ **BE PREPARED TO DEAL WITH QUESTIONS.** to give clarification, additional information, and comment on problems in a frank, candid, and helpful manner. Each presentation will be adjudged by expert session chair for selection in Lecture Notes in Civil Engineering and for one of the three best paper awards.
- ✓ **ENSURE GOOD INTERNET BANDWIDTH AND INSTALL GOOGLE MEET.** Kindly ensure that you are able to present your powerpoint presentation via google meet in full screen mode and your audio and video are clearly transmitting, in case of any technical help needed regarding google meet platform you may refer "<https://support.google.com/meet/?hl=en> "
